# **Health Requirements:**

## **BVD-PI** Testing

• All cattle, llamas and alpacas exhibited at NY county fairs or the State Fair must be negative to an approved test appropriate to detect Bovine Viral Diarrhea persistent infection (BVD-PI). The testing veterinarian is responsible to make sure the proper test is conducted. This is a once in a lifetime test that must be reported on the required certificate of veterinary inspection. The issuing veterinarian is responsible for verifying the validity of the test, the identification of the animal and recording the test date on the CVI. If a previous test is not verifiable the test must be repeated.

## **General Stalling Information**

- Stalling will be assigned. All exhibitors will be notified of their stall assignments on arrival. Entries will be accepted up to the capacity of the barn. The stalls are 8' x 8' stationary stalls. All sides are open vertical pipes and roughly 4' high. The floors are cement, and electricity and water are available near each stall. The exhibitor must supply hoses, extension cords, and multiple outlets if desired.
- Tack, feed, and hay must be kept within a stall. All stalls can be decorated.
