

BEEF CATTLE

Special Note

We cannot fit all breeds in the barn at the same time, so we have three different rotations. In the middle of the Fair we have one day to completely clean out the barn for the health of the cattle so on August 29 there will be no cattle until late afternoon. If you are interested in seeing a certain breed of beef cattle, please check the schedule below.

Also, for the health and welfare of our beef cows we put most of the cows outside every night around 6:00pm. They are tied up behind the barn until the next morning. Please check the schedule below to make sure you will see a full barn of beef cattle on your trip to the New York State Fair.
